

ISO 22301

Business continuity management certification

ISO 22301 deals with the management of business continuity. Its aim is to mitigate problems of service in the event of an emergency situation; thereby protecting companies against their inability to do business. Certification to ISO 22301 gives confidence that a business has systems and controls in place to prevent unwanted occurrences and deal with any situations that may arise, enabling continuity of trading.

Benefits of ISO 22301 certification:

- ensures continuity of provided products and services and reduces impacts of emergencies and breakdowns
- increases the organisation's credibility for partners and customers
- ensures compliance with legislation, regulators and customers
- brings savings on insurance premiums.

Why choose URS?

The extensive range and high quality of the services provided by URS has attracted more than 40,000 contracts across 32 countries.

Certified organisations can include URS logos in their promotional activities.
