

ISO/TS 16949

Quality management certification for the automotive industry

ISO/TS 16949 includes special requirements for organisations supplying the automotive sector. These supplement standard quality management requirements for companies that produce parts or spares for automobiles. ISO/TS 16949 certification is frequently a requirement for companies wishing to trade within the automotive industry.

Benefits of ISO/TS 16949 certification:

- increases production efficiency and reduces error rates
- ensures necessary production quality for the automotive industry
- prevents financial losses as a result of low quality of production
- enables a company to enter and remain in automotive supplier chain
- creates a responsible corporate status
- is an excellent training tool for employees and staff
- it is a mandatory requirement of many OEMs and 1st Tier suppliers that their customers are ISO/TS 16 949 certified

Why choose URS?

URS is approved by the International Automotive Task Force (IATF) to certify suppliers to ISO/TS 16949.

The extensive range and high quality of the services provided by URS has attracted more than 40,000 contracts across 32 countries.

URS is a significant player in the ISO/TS certification market and this is demonstrated by URS being in the top five worldwide registrars in terms of ISO/TS certified clients and in some cases the number one provider.

Certified organisations can include URS logos as part of their promotional activities.
